

MECHANICAL HANDLING INSPECTION AND CERTIFICATION

DALAZ Teknik Utama carried out Mechanical handling Inspection and Certification of Mechanical Handling Monorails for BW CATCHER FPSO Module M50 (WATER INJECTION & WATER TREATMENT MODULE), This FPSO will be operating at Premier Oil Catcher field in the UK North Sea.

PROJECT SCOPE:

- Mechanical Handling Study
- Inspection and Certification of Monorails
- Comply with LOLER 1998 & DNV

CHALLENGES:

Due to limited access and time frame, DALAZ team has challenged to do the Inspection and Testing of Mechanical Handling Monorails inside the Module.

PROJECT COMPLETION:

DALAZ Team achieved project completion in time following to contract agreement with zero non productive time and giving the high quality performance during the project commencing.

DALAZ COMMENT:

"Tight schedule given by client and the project finish in timely manner and put safety in top priority." Ryan Alfredi, DALAZ QHSE Manager.

CLIENT FEEDBACK:

Good Communication and attitude to safety, Excellent job well done to you and your team.
